Ethernet to Ethernet Grounded ESD Protection

The Surge Protector is designed to protect any Power-over-Ethernet (PoE) or non-PoE device with connection speeds of up to 1 Gbps

Installing Surge Protector devices, one is nearly terminal equipment (such as PoE/non-PoE outdoor cameras, Outdoor AP), and the other at source equipment (such as PoE/non-PoE Switch, Router). Damaging ESD attacks and surges will be absorbed by the Surge Protector devices and safely discharged into the ground. It is a cost-effective solution for protecting expensive outdoor Ethernet devices.
