

# CERIO SFP Module Achieves High-speed, Reliable, Long-distance

The CERIO SFP/SFP+ fiber module series can be applied to various network devices, including switches, routers, firewalls, and more. They comply with the SFP Multi-Source Agreement (MSA) protocol, using high-quality raw materials and development in Taiwan. They pass rigorous testing to ensure product quality and reliability. Achieve high-speed and stable data transmission, effectively meeting the needs of different customers. Support hot-swapping, making maintenance and upgrades convenient.

## SFP/SFP+ OPTICAL TRANSCEIVER MODULE SOLUTION

Multi Gigabit Ethernet Speed

DDM Function

Signal Mode / Multi Mode

LC Connectors

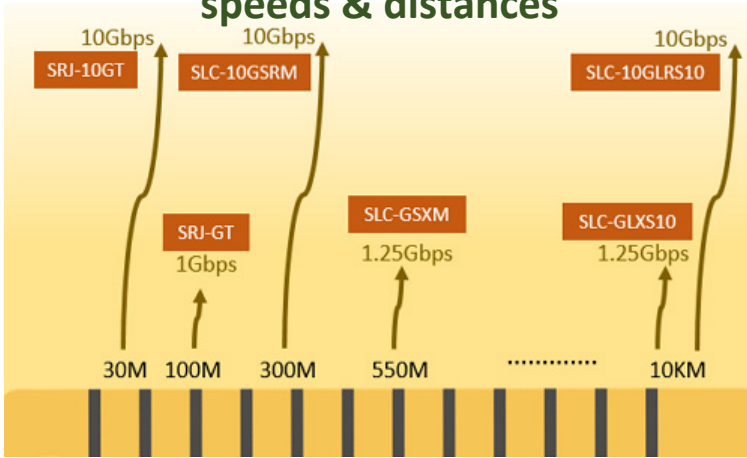

www.cerio.com.tw

- ✓ Complying with IEEE 802.3ab · 802.3z · 802.3bz · 802.3an 及 802.3ae standards.
- ✓ Compliant with SFP Multi-Source Agreement (MSA).
- ✓ Supports 1/2.5/5/10Gbps Ethernet transmission capability.
- ✓ The maximum fiber transmission distance can support 30M / 100M / 300M / 550M /10KM etc. according to different models.
- ✓ Built in DDM, Digital Diagnostic Monitor function.
- ✓ Low power consumption.
- ✓ Hot-pluggable remove and install module.
- ✓ Duplex LC / RJ45 connectors.
- ✓ RoHS compliant.
- ✓ Plug and play, easy installation and made in Taiwan.

Meet needs of various speeds & distances

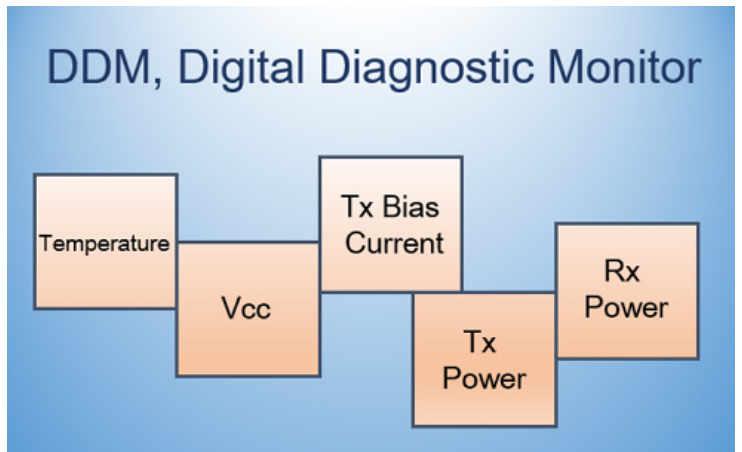

Low power consumption, energy saving & environmental protection

Lightweight, plug & play, easy installation

DDM (Temp, Volt, Current, Tx/Rx PWR)
